

JPE Replication Report

PUBLISHED
May 4, 2026

1 Paper Identification

ID	20210561
Author	Gondhi
Title	Strategic Wishful Thinking: Implications for Forecasts
Iteration	1

2 Summary

In assessing compliance with our [Data and Code Availability Policy](#), our reproducibility team has identified the following issues, which we ask you to address:

1. You mention that the user should set a random seed: You should do that, and highlight in the readme where (and how) this is set.
2. Please document your precise computational setup (standard computer is not sufficient)
3. We list a by default potential PII, please verify.
4. Modify the title of the readme a sper our guidelines.
5. All exhibits are fine.

3 General

- ☒ Data Availability and Provenance Statements
 - ☒ Statement about Rights - Part 1: Right to use the data (e.g. *did the authors lawfully obtain the data*)
 - ☒ Statement about Rights - Part 2: Right to publish the data (e.g. *are human subjects involved and did permission been granted to publish their data?*)
 - ☒ License for Data (optional, but recommended)
 - ☐ Details on each Data Source
- ☐ Dataset list
- ☒ Computational requirements
 - ☒ Software Requirements
 - ☐ Controlled Randomness (as necessary)

- ☒ Memory, Runtime, and Storage Requirements
- ☐ Description of programs/code
 - ☐ License for Code (Optional, but recommended)
- ☐ List of tables and programs
- ☐ References (Optional, but recommended)

4 High-level Description of Research Project

This research project...

- ☐ uses observational data.
- ☐ uses *confidential* observational data.
- ☐ uses data generated via experiment or trial by the authors (in field or lab).
 - ☐ For lab experiments: The code to implement the experimental protocol (z-Tree, o-Tree etc) is included in the package.
 - ☐ A PDF copy of IRB approval is contained in the package.
 - ☐ A PDF document outlining the design of the experiment, including information on the selection and eligibility of participants is included.
 - ☐ A PDF copy of the instructions given to participants in both original language and an English translation is included.
- ☐ uses data generated via survey by the authors (in field or online)
 - ☐ The programs used to administer the survey (e.g. qualtrics survey file) are included.
 - ☐ A PDF copy of IRB approval is contained in the package.
 - ☐ A PDF of the original questionnaire(s) and information on the selection and eligibility of participants is included.
- ☒ is a simulation study: the data are generated by an algorithm.
- ☐ is a numerical illustration: no data are used but code is used to produce illustrative output (tables, figures)

5 Data description

5.1 Data Sources

6 Requirements

- ☒ README is in TXT, MD, or PDF format
- ☒ README is accessible at the root of the package (not inside a folder)
- ☐ Title conforms to guidance (starts with "Data and Code for: Title of Paper" or "Code for: Title of Paper", is properly capitalized)
- ☐ Authors (with affiliations) are listed in the same order as on the paper

{REQUIRED} Please review the title of the deposit as per our guidelines.

{REQUIRED} Please review authors and affiliations on the deposit. In general, they are the same, and in the same order, as for the manuscript; however, authors can deviate from that order.

6.1 Stated Requirements

- ☐ No requirements specified
- ☒ Software Requirements specified as follows:
 - Windows, macOS, or Linux
 - MATLAB (recommended R2021b or later)
- ☒ Computational Requirements specified as follows:
 - Standard desktop/laptop CPU; no GPU required
- ☒ Time Requirements specified as follows:
 - Full run from source code to all outputs: approximately 2-10 minutes on a typical modern laptop
- ☒ Requirements are complete.

7 Analyzing Data and Code Files

7.1 Potential Personal Identifiable Information (PII)

⚠ We found the following instances of potentially personally identifying information. This may be completely legitimate but might be worth checking. *As a reminder, privacy legislation in many countries (e.g. GDPR in EU) prohibits the dissemination of personal identifiable information without prior (and documented) consent of individuals.* If indeed you want to publish such information with your replication package, you should probably have obtained IRB approval for this - please check!

Summary: - Data files with PII indicators: 0 - Variables flagged in data: 0 - Code files with PII references: 3 - PII references in code: 3

7.1.1 Summary of Flagged Files

File Type	File	Variables/References	PII Categories
Code	Figure1.m	1	name
Code	Figure2.m	1	name
Code	run_all.m	1	name

See [Appendix](#) for detailed listing of all flagged instances.

7.1.2 File Paths Report

Generated on 2026-04-28T10:44:11.003

Warning: Our search on file path types is imperfect and incurs both type 1 and type 2 errors. We aim to strike a reasonable balance between both. The below table is therefore only indicative. Detailed listings can be found in the appendix to this report.

In this table we analyse all files which contain source code (not data and documentation), and we report the grand total of each type of filepath we encountered.

Please check and replace any windows filepaths with unix compliant paths, insofar as this is possible in your setup. (Notice that STATA allows / to be a filepath separator on a windows platform, hence this is a requirement for all STATA applications.)

Files Analyzed	Windows Paths	Unix Paths	Mixed Paths	Drive Letters (C:\ etc)
3	0	2	0	0

7.1.3 Duplicate Files Report

We found the following duplicate files:

Filename	Size (MB)	Checksum (MD5)
/JPE_data_replication/output/logs/.gitkeep	0.0	ba8ab5a0280b953aa97435ff8946cbcb2755a27

7.1.4 Zero Size Files Report

We did not find any zero sized files.

7.1.5 Large Files Report

We did not find any files larger than 100MB.

7.2 Code description

There are 3 provided Matlab .m files. There's one .ps1 file that was used to zip the replication package.

cloc	github.com/AIDanial/cloc v 2.02 T=0.04 s (268.6 files/s, 10259.9 lines/s)			
Language	files	blank	comment	code
MATLAB	3	17	3	179

Language	files	blank	comment	code
Markdown	4	45	0	102
PowerShell	1	5	1	11
Text	1	4	0	8
CSV	1	0	0	7
---	---	---	---	---
SUM:	10	71	4	307

☒ The replication package contains a "main" or "master" file(s) which calls all other auxiliary programs.

7.3 Computing Environment of the Replicator

- Nuvolos, Linux, 4 vCPU, 16 GB RAM
- Matlab R2024b

8 Replication

- Downloaded code and data from dropbox and git repo using Nuvolos jpe-template.
- Ran code as per README.
- Code ran successfully.

9 Findings

9.1 Data Preparation Code

- Program `run_all.m` that ran `Figure1.m` and `Figure2.m` ran without issues reproducing all results.

9.2 Tables and Figures

In-text numbers	Program	Line Number	Reproduced?
tau=1	Figure1.m	2	Yes
tau_e=1	Figure1.m	3	Yes
tau_eta=1	Figure1.m	4	Yes

In-text numbers	Program	Line Number	Reproduced?
deltah=4	Figure1.m	5	Yes
psi=0	Figure1.m	9	Yes
chi=1	Figure1.m	10	Yes
tau=1	Figure2.m	2	Yes
tau_eta=1	Figure2.m	2	Yes
tau_e=1	Figure2.m	2	Yes
deltal=0.55	Figure2.m	3	Yes
rho=0	Figure2.m	8	Yes

Figure/Table #	Program	Line Number	Reproduced?
Figure 1	Figure1.m	66	Yes
Figure 2	Figure2.m	119	Yes

- Figure 1: Looks the same.
- Figure 2: Panels (a), (b) and (c) have different x-ticks in the reproduced version. Panels (b) and (c) also y-ticks. Legend in panel (c) is lacking the maximum value of 0.06. Panels (b) and (c) in the replicated version display the number on the most bottom curve twice, i.e. 0.43 and 0.06 in panel (b) and (c) respectively. In the original, it appears only once.

Paper version

Figure 1

Figure 2

Paper version

Figure 3

9.3 In-Text Numbers

- ☒ In-text numbers not verified.
- ☐ There are no in-text numbers, or all in-text numbers stem from tables and figures.
- ☐ There are in-text numbers, but they are not identified in the code

9.4 Other Issues

- There's an additional folder that is `JPE_data_replication` inside `replication-package`. Please make sure all the content is directly in the `replication-package` folder.
- Paper and appendix are in one pdf file. Please separate them.
- Memory and storage requirements not stated. CPU requirements as "Standard desktop/laptop CPU"; it only needs to plot static figures in matlab, so it's justifiable? @jpedataeditor

- Missing list of tables and programs. Please move the description of the scripts from code folder to README.md in the replication-package folder.

10 Classification

- ☐ full reproduction
- ☒ full reproduction with minor issues
- ☐ partial reproduction (see above)
- ☐ not able to reproduce most or all of the results (reasons see above)

10.1 Reason for incomplete reproducibility

- ☐ None.
- ☒ **Discrepancy in output** (either figures or numbers in tables or text differ)
- ☐ **Bugs in code** that were fixable by the replicator (but should be fixed in the final deposit)
- ☐ **Code missing**, in particular if it prevented the replicator from completing the reproducibility check
 - ☐ **Data preparation code missing** should be checked if the code missing seems to be data preparation code
- ☐ **Code not functional** is more severe than a simple bug: it prevented the replicator from completing the reproducibility check
- ☐ **Software not available to replicator** may happen for a variety of reasons, but in particular (a) when the software is commercial, and the replicator does not have access to a licensed copy, or (b) the software is open-source, but a specific version required to conduct the reproducibility check is not available.
- ☐ **Insufficient time available to replicator** is applicable when (a) running the code would take weeks or more (b) running the code might take less time if sufficient compute resources were to be brought to bear, but no such resources can be accessed in a timely fashion (c) the replication package is very complex, and following all (manual and scripted) steps would take too long.
- ☐ **Data missing** is marked when data *should* be available, but was erroneously not provided, or is not accessible via the procedures described in the replication package
- ☐ **Data not available** is marked when data requires additional access steps, for instance purchase or application procedure.
- ☐ **Missing README** is marked if there is no README to guide the replicator, or the README is not in compliance with JPE requirements
